

High-Quality Fan Power Cords – Reliable Electrical Connectivity for Cooling Systems

GardTec Inc. offers a **wide range** of **fan power cords** engineered for **reliability, safety**, and performance across various cooling applications. Our fan power cords are designed to support AC and DC cooling fans, ensuring a steady and secure power connection in both industrial and commercial environments.

These cords are available in multiple configurations, including 2-pin and 3-pin connectors, and support various voltage and amperage ranges. Whether you're powering a single axial fan

or multiple high-performance fans in a server or HVAC system, GardTec's power cords deliver consistent results backed by quality manufacturing.

Product Highlights:

- Compatible with major cooling fan models
- Multiple lengths and connector options available
- UL-approved components for safety and compliance
- Resistant to heat and wear – suitable for industrial use

Ideal for enclosures, data centers, and OEM fan installations

These durable fan power cords are an essential component in any efficient cooling setup. They ensure a clean, uninterrupted power supply, reduce installation hassle, and promote long-term reliability of your fan systems.
